Re: Water Leak Repair and Disruption of Service

The Village of St. Louis Village wishes to inform all residents and water services customers that a municipal water line repair that was originally scheduled to be completed on April 15, 2026 will now be conducted on **Monday April 20, 2026**.

As such, water service for all customers will be disrupted on Monday April 20, 2026, beginning at approximately 10 AM, for an undisclosed period of time. It is anticipated that the repair work could take 4-6 hours. All water service customers will not have access to potable water during this time.

The community will be subject to a Precautionary Drinking Water Advisory (PDWA) once service is restored. This PDWA is expected to be in place for approximately 5-7 days. Further information regarding the PDWA will be provided once details are available.

If you have any questions, please contact the Village Office at 306-422-8471.

Thank you for your patience and understanding.

St. Louis Village Council
